LAB SAFETY RULES

The safety policies and procedures listed below must be followed in the laboratory. Failure to comply with these rules may result in dismissal or suspension from the laboratory.

1. Be aware of the locations of fire extinguishers and first aid kits.
2. The emergency telephone is in the hallway (dial 911 for emergencies).
3. For non-emergency issues dial 8-5454 to contact campus police.
4. All accidents or injuries, however slight, must immediately be called to the attention of the laboratory instructor who will advise the student on the course of action to be taken.
5. Unauthorized experiments are prohibited. Follow the laboratory directions carefully.
6. Food and beverages are prohibited in the laboratory.
7. Do not remove any laboratory equipment or supplies from the laboratory.
8. Never work in the laboratory without supervision.
9. Never look directly into a laser beam or point a laser beam at someone else.
10. Use care when handling electrical equipment in order to avoid electrical shock.
11. Notify the instructor in case of damaged power cords or other problems with electrical equipment.
12. Careless acts are prohibited.

I have read and understand these rules and agree follow them to the best of my ability.
